# Acknowledgement

The success and final outcome of this project required a lot of guidance and assistance from many people and I am extremely fortunate to have got this all along the completion of my project work. Whatever I have done is only due to such guidance and assistance and I would not forget to thank them.

I would like to thank my parents, and my friend Prashanth Sateesh and whoever else has been involved in helping me in finishing this project. The Creators of Internet, Youtube channel Investary and Dubai Metro site, which I referred to for getting a general idea about my project.

Also I would like to extend my gratitude to my computer Teacher, Mrs. Megha Jain who guided me how to use functions, lists, while loops, if, elif & else statements, etc.

Last, but not the least, I would like to thank God without whose support no one can do anything, however hardworking the you might be.
